## Portable Mounting for Tablets and Computers

Havis' wide range of computing and mounting solutions and peripheral accessories are a perfect fit for any mobile workstation including carts, forklifts, and more. We offer the industry's most reliable platform for connecting peripherals, which will greatly improve productivity all while allowing users to stay mobile around the warehouse.

### Computing & Mounting Solutions

Havis offers many different mounting products to integrate your laptop or tablet onto a safe and comfortable on-the-go solution.

Havis' wide range of computing solutions and peripheral accessories are a perfect fit for any mobile workstation, including carts and forklifts. We offer the industry's most reliable platform for connection to peripherals, like keyboards and bar code scanners, which greatly improves productivity while allowing users to stay mobile around the warehouse.

Rugged laptops and tablets are integral components to successful industrial and warehouse automation. Havis manufactures docking solutions that keep this technology securely and safely mounted in nearly any work environment. In addition to our laptop- and tablet-specific docking stations, we also offer our Universal Laptop and Tablet Mounts, which are compatible with a wide variety of manufacturers

Havis also understands that reliable access to office amenities in unconventional workspaces is a must. Therefore, our docking stations integrate intelligent port replication that allows users to connect to printers, keyboards, antennas, bar code scanners and many other essential peripherals. Strain relief and recessed ports protect these cable connections and prevent accidental disconnects.

The Desktop Stand provides a sturdy, anti skid base for mounting tablet docking stations and universal trays. The desktop stand lets you use your computer outside of a vehicle and on virtually any flat surface.

Contact us at [www.havis.com](http://www.havis.com) for assistance configuring a solution for your specific industrial mounting solution.
