

Dolphin 9900 Series

Mobile Computers

Dolphin® 9900 mobile computers are purpose-built for robust mobile data collection and communication solutions – combining a rugged, user-friendly design with a complete suite of technologies to enable maximum mobile user productivity and efficiency.

Seamless connectivity between mobile workers and the enterprise is enabled through integrated wireless WAN and LAN communications for high-speed data transfer and cellular voice communication – anytime, anywhere. Bluetooth® connectivity to any compatible wireless device broadens the mobile worker's capabilities in the field.

Integrated Global Positioning System (GPS) technology enables location-based functionality such as turn-by-turn navigation, and route optimization, and the ability to document proof of visitation or service with a time and location stamp.

Adaptus® Imaging Technology 5.0 provides workers with the data capture functionality they need to get the job done quickly and efficiently – whether it is scanning a package for delivery confirmation, tracking inventory, electronically capturing a signature for proof of receipt, or taking a picture of damaged goods.

Just as important as the technologies the user puts to work, an innovative power management system ensures they get battery life that lasts a full work shift, even in wireless, scan-intensive environments.

Rugged, ergonomic and full-featured, the Dolphin 9900 mobile computer is the right choice where real-time information processing and solution reliability is critical to a company's operation.
